

INDIA.RUNS

Build what next India runs on

Track 3

Everyday AI Innovation Challenge

Redrob Context & Ideathon Scope

Redrob AI is building an AI-native ecosystem spanning hiring, productivity, communication, discovery, workflows, recommendations, automation, and intelligent user experiences.

Participants are encouraged to think beyond standalone applications and explore how their ideas can:

Extend existing
Redrob
capabilities

Improve
experiences for
Redrob users

Introduce
new AI-native
workflows

Strengthen ecosystem
engagement and
network effects

Important

Participants are not expected to build a completely new platform from scratch.

Strong submissions will demonstrate:

How the idea leverages existing Redrob capabilities

What new capability, workflow, or value layer is introduced

How the idea strengthens the overall Redrob ecosystem

Why Redrob is uniquely positioned to enable this experience

INDIA.RUNS

Build what next India runs on

Track 03

Everyday AI Innovation Challenge

Team Name: VibeTribe

Team Members: Anand Rajendran

Idea: AI-Powered Candidate Ranking & Team-Hiring Composition System

Automated ranking and intelligent team composition from large-scale candidate pools using semantic skill matching and multi-dimensional scoring

Problem We Want To Solve

- HR teams manually review thousands of candidates, consuming weeks of effort
- 50,000+ profiles create bottleneck in hiring pipeline
- Skill matching done with keyword matching—missing semantic understanding
- Team composition requires multiple iterations and subjective decisions
- No unified scoring system across experience, skills, and engagement

Idea Overview

- Core Components:
 - **Semantic Skill Matching:** Uses sentence-transformers (all-MiniLM-L6-v2) to understand skill context
 - **Multi-Dimensional Scoring:** Combines skill match (40%), experience (25%), education (15%), engagement (20%)
 - **Automated Ranking:** Ranks 50,000 candidates per role in ~11 minutes
 - **Intelligent Team Composition:** Generates 10 optimal team combinations with synergy scoring
 - **Scalable Output:** Exports full 50-profile rankings per role in JSON, CSV, and XLSX formats
- How It Solves the Problem:
 - Reduces manual screening from weeks to seconds
 - Provides semantic understanding beyond keyword matching
 - Enables data-driven team composition
 - Delivers transparent scoring for every candidate

Understanding The User

- **User Challenges:**
 - • **Time Pressure:** Manual screening of 50K+ candidates takes weeks
 - • **Information Overload:** Difficult to compare candidates across multiple dimensions
 - • **Subjectivity:** Team composition decisions lack data-driven justification
 - • **Consistency:** Hard to maintain uniform scoring standards
 - • **Expertise Gap:** Junior recruiters lack domain knowledge for technical roles
- **How System Helps:**
 - • Provides structured rankings with clear scoring rationale
 - • Automates repetitive screening tasks
 - • Enables quick side-by-side candidate comparisons
 - • Generates multiple team options for informed decision-making
 - • Scales expertise across organization

User Journey & Experience

● Step 1: System Setup (5 mins)

- Configure role requirements (skills, experience, education)
- Define weighting for scoring formula

● Step 2: Data Loading (2 mins)

- Upload candidate database (JSONL format)
- System validates data structure

● Step 4: Review & Export (10 mins)

- View top 50 profiles in interactive JSON/CSV/XLSX format
- Compare scores and skill coverage across candidates
- Export for team discussion or import into HR systems

● Step 3: Ranking Execution (11 mins for 50K candidates)

- System processes all candidates per role
- Applies multi-dimensional scoring algorithm
- Generates 50 ranked candidates per role

● Step 5: Team Composition (5 mins)

- System suggests 10 optimal team combinations
- Each combination has synergy score and rationale
- HR selects and finalizes team

Result: Complete hiring pipeline executed in ~30 minutes vs. weeks of manual work

AI-Powered Experience

- **Semantic Skill Matching (AI: NLP)**
 - Uses pre-trained sentence-transformers model
 - Understands skill context beyond keywords
 - Automation: Replaces manual keyword matching
- **Multi-Dimensional Scoring (AI: Weighted Ranking)**
 - Combines 4 dimensions: skills, experience, education, engagement
 - Intelligent formula balances multiple factors
 - Automation: Eliminates subjective decisions
- **Batch Processing (Optimization)**
 - Sample dataset with 50,000 candidates processed in 11 minutes with Parallel scoring across dimensions
 - Automation: Scales to enterprise
- **Team Synergy Scoring (AI: Combinatorial Optimization)**
 - Evaluates 10 team compositions and Calculates member synergy
 - Automation: Generates suggestions
- **Explainable Results**
 - Every candidate has ranked position and score with Skill coverage shown
 - Automation: Transparent scoring enables informed decisions

Accessibility & Inclusivity

● Diverse User Access

- • HR managers: Direct web interface access
- Recruiters: Can filter and export rankings
- Data analysts: Access to raw JSON data
- Executives: Comprehensive reports and summaries

● Data-Driven Fairness

- Removes subjective bias from candidate screening
- Transparent scoring criteria for all candidates
- All candidates evaluated on same scale
- Enables fair comparison across backgrounds

● Multiple Role Support

- System works for any technical or non-technical role
- Customizable skill requirements per role
- Weights adjustable for different team needs
- Scales from startup (5 roles) to enterprise (50+ roles)

● Multiple Export Formats

- • JSON, CSV, XLSX, Markdown for different users
- Accessible to business and technical users

● Candidate-Side Benefits

- Evaluated on actual skills, not demographics
- Access to wider audience of roles
- 50-profile shortlist provides multiple opportunities

Impact & Real-World Benefits

● For HR/Recruiting Teams:

- ✓ 90% reduction in time spent on candidate screening (weeks → hours)
- ✓ Process 50K+ candidates efficiently and consistently
- ✓ Data-backed hiring decisions with full justification trail
- ✓ Reduced cost per hire through automation
- ✓ Improved time-to-hire metrics

● For Candidates:

- ✓ Fairer evaluation process based on skills and qualifications
- ✓ Increased visibility for qualified candidates
- ✓ Transparent ranking system with clear scoring criteria
- ✓ Access to multiple opportunities (50-profile shortlist per role)

● For Organizations:

- ✓ Better quality hires through systematic evaluation
- ✓ Reduced hiring bias and improved DEI metrics
- ✓ Scalable hiring process for rapid growth
- ✓ Data foundation for continuous improvement
- ✓ Improved team composition and synergy

● Real-World Application:

- ✓ Tested on 50,000 candidate profiles
- ✓ 5 roles ranked with 50 candidates each
- ✓ 10 team compositions generated and evaluated
- ✓ Verified with manual spot-checks
- ✓ Ready for production deployment

Future Potential

● Phase 2: Enhanced AI Features

- Resume Parser: Extract structured data from resume PDFs
- Interview Preparation: AI-suggested questions per candidate profile
- Skill Gap Analyzer: Identify gaps between requirements and candidate pool
- Predictive Success: ML model to predict candidate performance post-hire

● Phase 3: Integration & Ecosystem

- HR System Integration: Direct connection to ATS (Applicant Tracking Systems)
- Slack/Teams Bot: Commands to query rankings and team suggestions
- Custom Role Templates: Pre-built configurations for common roles
- Team Analytics Dashboard: Visualizations of hiring trends and metrics

● Phase 4: Advanced Features

- Multi-Language Support: Handle resumes in multiple languages
- Video Interview Analysis: Evaluate candidates from video interviews
- Culture Fit Scoring: Additional dimension beyond technical skills
- Salary Prediction: Recommend compensation based on profile

● Long-Term Vision:

- ✓ Platform becomes centerpiece of modern hiring infrastructure
- ✓ Extends beyond hiring: Internal mobility, promotion recommendations
- ✓ Continuous learning: Improves with each hiring cycle
- ✓ Enterprise: Become standard in 100+ companies
